Burning Forest // Myca

THE INNOVATION

Real stone, thin & flexible

Slate-Lite is an innovative real stone veneer consisting of an ultra-thin natural stone layer and a carrier reinforced with glass fibres or cotton.

We have developed a special process to produce many paper-thin slabs from the most beautiful stone blocks in the world.

Each of these slabs is unique and handcrafted in over 12 processing steps.

Despite its lightness, *Slate-Lite* stone veneer retains the feel and look of a solid stone slab.

At the same time, our stone veneer is only approx. 1.5 mm (0.06 in) thin and even flexible!

THE ORIGINAL

Highest quality standards
for over 20 years

DIN EN 15102:2011-12
DIN EN 15102:2008+A1:2011

STANDARD SIZES

XXL sizes up to 3.500 mm (137.79 in)

Whether creative laying patterns with small format tiles or virtually seamless design statements with our XXL formats:
With *Slate-Lite*, you can design your building project exactly according to your wishes.

If you want to save time and work, you can even order our stone veneers directly in the individual desired size!

Some of our decors are even available in special sizes up to 3.500 mm (137.79 in) in length.
Just contact us if necessary, and we will produce your stone veneers directly in special sizes in our factory.

SILVER GREY // 2.400 x 1.200 mm (47.24 x 94.48 in)

SIMPLE PROCESSING

4 working steps to success –
without any special tools

1) CUTTING TO SIZE

Cut stone veneer to the right size if necessary. This works by hand or table saw, multitool or laser.

2) PROTECT

Depending on the place of application, apply an impregnation or sealant with a lint-free roller.

3) BONDING

Apply a suitable adhesive to the entire surface of the mounting surface or the back of the material.

4) ATTACHMENT

Position the stone veneer in the desired position and press into place.
DONE, THAT'S ALL!

FREQUENTLY ASKED QUESTIONS – quickly answered.

In our online shop you will find the complete FAQ with questions and answers about our stone veneers:

www.slate-lite.com

ARTIFICIAL STONE OR REAL STONE?

The *Slate-Lite* stone veneers have a 100% natural stone surface, it is not an artificial stone!

WHICH SUBSTRATES ARE POSSIBLE?

Almost any material is suitable as a substrate, including concrete, sheetrock, wood, metal, tile, plaster, acrylic, etc. The substrate just needs to be smooth, dust-free, clean and dry.

HOW DURABLE IS SLATE-LITE?

Slate-Lite is more robust than a conventional rough stone slab. Our stone veneers are also UV-resistant and frost-proof, making them suitable for outdoor use.

DO I NEED TO PROTECT THE STONE SURFACE?

In many areas, no additional protection is necessary. However, in wet areas and kitchens, and when used as flooring, the material should be impregnated or sealed to ensure the best possible protection for the real stone.

WHAT DOES MY STONE SHEET LOOK LIKE?

Each sheet of *Slate-Lite* is unique in pattern and texture. However, we take care when ordering to ensure deliveries are as close to batch as possible.

With our optional photomatching service, you can also select your desired decor from the available batches before delivery.

WHERE CAN I SEE SLATE-LITE IN PERSON?

You can find all of *Slate-Lite*'s trade partners worldwide online, including contact details and showroom information: www.slate-lite.com/StoreLocator.

In our online shop, you can of course also order samples of each decor in order to convince yourself personally of the quality of our stones.

ENVIRONMENTAL PROMISE

Improved eco-balance with lower CO₂ emissions

Climate neutral printing

The emission rates on the transport routes are much lower with *Slate-Lite* than with conventional stone slabs, resulting in a much more positive eco-balance.

One sheet of *Slate-Lite* produces approx. 95% less CO₂ than a conventional thick stone slab during transport!*)

In addition, the manufacturing process we have developed also conserves natural resources in the quarries: From the stone material of a single conventional stone slab of 2 cm, we obtain 200- 300 slabs of *Slate-Lite*, depending on the decor!

*) During transport compared to conventional stone slabs, see sample calculation.

	Transport route	Material (m ²)	Charge (kg)
Slate-Lite	Container 40'	10.637 m ²	26.500 kg
Granite slab (2 cm)	Container 40'	441 m ²	26.500 kg
	Distance (km)	CO ₂ emission (g)	CO ₂ emission / m ²
Slate-Lite	7.500 km	3.001.125,00	282,12 g
Granite slab (2 cm)	7.500 km	3.001.125,00	6.806,27 g

By the way:

You can return all sample sets to us after use, get your money back and thus also make a contribution to the conscious use of materials and resources.

BOOKMATCHING-SETS

Design highlights made of several
XXL panels for a brilliant spacial effect

Our bookmatching sets are special: each set contains several *Slate-Lite* large formats in the format 2.400 x 1.200 mm (47.24 x 94.48 in) with mirrored structures for an impressive overall appearance. The 100% natural stone structures are coordinated in such a way that you create a mirror-image matching pattern that can be arranged in different ways!

OUR SERVICES

Our full service for professional requirements

CUTTING // CIRCULAR SAW

- ▶ Final format 50 - 2,800 mm
- ▶ Tolerance 0.5 mm
- ▶ Angle cuts possible
- ▶ Mitre cuts with pressed material

PRESSING

- ▶ Max. 2.800 x 1.200 mm
- ▶ MDF, chipboard, HPL, acrylic, Aludibond etc.
- ▶ Individual supports possible
- ▶ Moulded components

PROTECTION

- ▶ Impregnation / sealing / lacquering
- ▶ 1-coat / 2-coat sealing
- ▶ Fields of application: Kitchen, bathroom, wet area, floor, etc.

EDGES

- ▶ Lacquered edges
- ▶ Edge height 4 - 40 mm
- ▶ Various colors

LASER-CUTS

- ▶ Max. 3.000 x 1.400 mm
- ▶ Cut-outs, shape cuts, logos, etc.
- ▶ No engravings

UV PRINTING

- ▶ 4-color printing
- ▶ Max. 3.000 x 2.000 mm
- ▶ White printing possible

From the individual piece to series production: We offer a wide range of services and processing options around our stone veneers.

SLATE|LITE

The all-rounder

DATA SHEET

Suitable indoors & outdoors ✓

Variable sizes up to XXL ✓

More robust than raw stone slabs ✓

Slate-Lite is a thin stone veneer with a fibreglass backing and 100% natural stone surface. Despite its lightness and an overall thickness of only approx. 1.5 mm (0.06 in), it is extremely robust and durable.

Slate-Lite can be used both indoors and outdoors for wall cladding, flooring or as a tile backsplash in the kitchen.

Even extraordinary living environments made of stone in wet areas such as bathrooms or the shower are possible with *Slate-Lite*!

100% natural stone surface
Total thickness: approx. 1.5- 2.5 mm
Weight: approx. 1.5 kg/m²
Substrate: Fibreglass

Size accuracy: 1-2 mm
Maximum temperature: 120°C
Bendable radius: approx. 5 cm

www.slate-lite.com

ULTRA THIN^{eco+}

The flexibility miracle

DATA SHEET

- ✓ 3D formable
- ✓ Can be cut with scissors
- ✓ Total thickness <1mm

SAMPLES
NOW!

UltraThin eco+ is an extremely thin and flexible real stone decor with a cotton mat as substrate.

CO₂-saving transport due to its light weight and low consumption of natural stone resources makes *UltraThin eco+* particularly environmentally friendly.

The natural mat on the reverse side allows for easy processing and opens up many new possibilities in interior design and furniture construction.

With *UltraThin eco+* you can even master complex special shapes and difficult edge areas!

100% natural stone surface
Total thickness: < 1.0 mm
Weight: approx. 0.8 kg/m²
Substrate: cotton & textile mat

Size accuracy: 1-2 mm
Maximum temperature: 60°C (80°C for short periods)
Bendable radius: 3D-formable

TRANS|LUCENT

Eyecatcher with luminosity

DATA SHEET

- Different effects depending on light source ✓
- Variable sizes up to 2.800 x 1.200 mm ✓
- Suitable for any light source ✓

With our *Translucent* decors, you become a lighting designer thanks to the transparent backing material!

Due to the translucent back, unique light effects can be created with a light source behind the sheet of stone, so that extraordinary backlit objects can be created!

Depending on the type of light, different effects are achieved: you can use cold, warm or even colored light to create your individual stone light object.

100% natural stone surface
Total thickness: approx. 1.5 - 2.5 mm
Weight: approx. 1.5 kg/m²
Substrate: fibreglass

Size accuracy: 1-2 mm
Maximum temperature: 120°C
Bendable radius: approx. 10 scm
